HASIBUL ISLAM
Senior Full Stack Engineer

Full stack engineer with **6+ years of experience** in building scalable platforms like CRM, SaaS, Real-Estate, eCommerce, automation, etc. Also specialized in Meta products API such as Facebook, Instagram, WhatsApp, Threads, etc.

WORK EXPERIENCE

1) Zubion Development Solutions Limited, *Full-Stack Developer (Part-Time - Remote)* • Sep. 2024 – Present

- Led full-stack development and deployment of ZDSL's business site, customer portal, and admin dashboard as part of the **company's first technical team**.
- Helped automate core business operations, **increasing productivity by 30%** for a non-technical real-estate company.
- Co-developed a scalable, multi-tenant real-estate CRM SaaS platform projected to **generate $50K–$80K+/month in revenue**.
- Designed and implemented end-to-end lead management workflows, including data capture, deal tracking, and client communication.

2) WeWise, *Software Developer (Full-Time - Remote)* • Apr. 2024 – Mar. 2025

- Built complete **WhatsApp marketing platform** (WiseLead & WiseBlast) with real-time interaction, **generated monthly revenue $10K-$15K**.
- Integrated webhook system with WordPress/Wix forms to auto-sync leads into CRMs like Monday.com and HubSpot.
- Enabled scheduled and event-based WhatsApp campaigns (e.g., birthdays, anniversaries) with smart job queuing and message tracking.
- Implemented multi-account management, blocked keyword filters, message-type support (text, voice, attachments), and a dynamic credit system.

3) MessageMind, *Chief Technology Officer (Full-Time - Remote)* • Jan. 2023 – Jan. 2025

- Built an **AI-powered customer support SaaS platform** to deliver intuitive and humanized customer experiences, **generated upto $20K monthly revenue**.
- Integrated omni-channel messaging with Facebook Messenger, Instagram, WhatsApp, and Gmail to unify customer communication in a single inbox.
- Engineered seamless eCommerce integrations with Shopify, WooCommerce, Wix, Squarespace, and BigCommerce to automate order support and tracking.
- Developed meeting booking modules with real-time sync using Zoom, Calendly, Google Meet, and custom booking tools.
- Led and managed the entire technical team, driving end-to-end delivery across frontend, backend, and DevOps with a hands-on leadership approach.

4) FoorWeb, *Full Stack Engineer (Full-Time - Remote)* • Jul. 2021 to Nov. 2023

- Rebuilt version 2 of FoorWeb's **eCommerce SaaS platform**, enabling instant store creation for Algerian merchants. **Monthly revenue $30K+**.
- Integrated payment options (Visa, MasterCard, CIB, Baridi Mob) and local shipping services (ZR Express, Maystro, Ecotrack).
- Implemented **tiered subscription features with dynamic access control** across Free, Urban, Advanced, and Legendary plans.
- Optimized mobile-first UI/UX to simplify store and order management for non-technical users. API response **speed increase upto 45%** then previous.

5) Upwork | Freelancer.com | Fiverr, *Full Stack Developer | Meta Product Expert (Freelance - Remote)* • Mar. 2019 – Present

- Provide contract or milestone basis full-stack development service
- Also provide hourly or milestone basis Meta products API services

Note: Fiverr account is suspended but started career with Fiverr.
